# Get your business ready for Making Tax Digital

---

Making Tax Digital (MTD) presents an important and immediate challenge to every VAT registered UK business, requiring decisive action to ensure compliance with the 2017 Finance Bill. We understand that legislative changes can be daunting, especially when you aren't sure of the effect it could have on your business and its processes.

Our team of experts are on hand to clarify anything you are unsure about, and talk you through next steps, shadowing you through the entire process.

**Don't leave it until the last minute. A huge number of businesses will have to migrate to MTD compliant software ahead of April 2019, ensure you are ready in plenty of time to avoid the last minute panic.**

# Making Tax Digital

---

## The logistics...

From 1st April 2019, businesses with a turnover that is above the VAT threshold (£85,000) must maintain digital business records and submit their VAT return through a new MTD approved system. You will no longer be able to manually enter your VAT figures onto the HMRC website, but instead submit them directly from authorised software.

If you own a business that is VAT registered you will need to move to digital record keeping, if you do not yet use software to record your VAT information, you need to start planning for MTD.

## MTD compliant solutions

Our MTD compliant software range:

**Sage 50cloud Accounts** is powerful desktop accounting software for established businesses to manage their finances. This cloud connected system is able to support your business to run more efficiently with a time-saving, in-depth solution for managing your accounting, invoicing, cash flow, inventory and so much more. From invoicing customers and paying suppliers to dealing with every aspect of your VAT and accounting, Sage 50cloud gives you the reliable information you need to stay in control and drive your business forward.

Sage 50cloud Accounts combines the best of both worlds. All the features and reliability of the industry-leading accounting software with the option to link your data in the cloud, giving you greater flexibility and security. It's easy to set up, can be adapted to suit your business and can be further customised to different roles and responsibilities within your organisation.

**Sage 200cloud** enables you to run a smarter, faster, more connected business. Eliminate downtime with a solution that is available 24/7. Manage your accounts, customers, manufacturing, supply chain and business intelligence whilst you're on the move. Sage 200cloud uses the power of both the desktop and cloud (through Microsoft Office 365) to support growing businesses. Collaborating in real time gives you the visibility and overview your business needs.

With the Microsoft Office 365 integration with Sage 200cloud, your sales team can work with your service and financial teams back in the office. Access to customer account information straight from Outlook, gives you the insight and power to grow and expand, working anytime, anywhere with Microsoft Office 365.

**Sage Business Cloud Financials** enables you to unleash the power to grow with mobile, multi-dimensional accounting in the cloud. Sage Financials is a powerful cloud-based business management solution for SME's built on the Salesforce platform. The cloud offers scalability and mobility - all required for business growth. Use this latest technology to experience an award-winning integrated, cloud-based solution, helping you manage your entire business, not just accounting.

Manage your finances in real-time, wherever you are and gain improved productivity and increased automation, helping you to focus on what you do best within your company. Gain clear visibility into your business performance and flexibility to react to customer demands and new opportunities allowing you to scale without complexity. Sage Financials ensures financial stability, allowing you to take confidence in cash flow when growth opportunities arise.

## Solutions Support

We are an award winning Sage Business Partner and offer a personalised, friendly first line service to your users. Your staff will get to know our technicians personally, creating an environment of trust and understanding in which any issues are resolved rapidly.

Our Support Technicians promptly solve cases and offer premium customer service, whilst ensuring accreditations are always up to date with on-going training for new releases. This enables quality expert service from those who know the ins and outs of your product.

The team includes consultants who have decades of experience working in the accounting industry and specialists who are accounting accredited. This wealth of knowledge means we can better understand your queries, gauge impact and provide the appropriate solution.

We pride ourselves on providing first class customer service, and as such, we are constantly looking for ways to enhance your support experience. Our customer service representatives work alongside our support team to monitor response times, manage prioritisation and maintain open communications with your staff. Their mission is to ensure that your business systems remain fully operable at all times, and users are confident and comfortable with technology.

## Customisation

Our team of accredited Sage Developers deliver bespoke modifications and enhancements to the standard Sage 200cloud system. Popular modifications are available as 'off-the shelf' modules to all Sage 200 users, for example, third party billing and ecommerce systems. If you have a need to enhance the functionalities of your Sage 200 system, we can help. Furthermore, should your chosen solution require specific amendments unique to your business, our in-house development team can tailor the software solutions to your needs.

## Why Solutions?

Our expert team will help you become MTD ready and understand how Sage Accounting solutions can be configured to support your business effectively. We help you through every step of the implementation process, from consultation and installation through to supporting your software and your business once you are up and running.

We provide full product training to help your users get the most out of the software and to become more effective in their engagements with your customers. You can relax in the knowledge that your system is MTD compliant.

As a leading Sage strategic partner, with many years' experience in delivering Sage Solutions for clients, our team can help you transform the way you do business, freeing up the valuable time you need to focus on achieving your business goals.
