

DeliveryPoint

Making it simple to organise customer deliveries

DeliveryPoint is a neat add-on to CounterPoint and ideal if you deliver products to your customers.

Managing fulfillment of your sales to customers

DeliveryPoint™

DeliveryPoint; simple for till users to book deliveries at the end of a sale

- Seamless process, sale to delivery
- Simple, fast booking at the till
- Delivery reminders
- COD and balance payments
- Driver notes
- Driver round management

A great delivery service

DeliveryPoint is the ideal tool for you to offer a great delivery service. It simply allows the till user to offer available delivery slots, add any delivery charges, and schedule the appointment.

Remind customers of their delivery

There are various ways to remind customers of their delivery: print confirmation from the receipt printer, auto-send an SMS reminder through DeliveryPoint or auto-send an email.

Back office functions

You can book vans out for repairs or lunch breaks, so the till operator only sees the available slots.

Help the drivers with their rounds

DeliveryPoint can export rounds to Google Maps and so help drivers manage their routes.

Balance Payments

If it's cash or balance on delivery you offer, DeliveryPoint will help manage this. The driver will know how much money to collect and from who, all the details are printed for them on the van schedule.

Beware of the Dog

Help maximise successful deliveries by giving the till operator the prompt to ask and write notes, like leave with a neighbour or the customer is on the 3rd floor of the building.

Check your delivery service is profitable

Recording of mileage and fuel purchased, even repairs, will help you understand the real costs of your delivery service and review any charges accordingly.

Our reseller network

DeliveryPoint is available as an add-on to CounterPoint EPoS for Sage 50 and Sage 200, is sold exclusively through our reseller network. Visit our website or call us for more information.
